# Fuel Tank Containment for 1,000-Gallon Tanks, 1,100 Gal. Capacity, With 2" Drain

The Fuel Tank Containment for 1,000-Gallon Tanks is secondary containment for tanks and equipment with 1,100 gallons of containment capacity.

This polyethylene containment sump sits under a 1,000-gallon above-ground fuel tank and catches leaks, drips and overfills before they reach the ground. It holds 1,100 gallons, more than the tank itself, which helps you meet EPA and SPCC secondary containment rules at commercial, industrial, farm and home fuel sites.

## GOOD FOR

- Above-ground fuel and oil tanks
- Farm, fleet and generator fuel tanks
- Job-site and temporary tank storage

## SPECIFICATIONS

| | |
|---|---|
| **Fits** | 1,000-gallon above-ground fuel tank |
| **Containment capacity** | 1,100 gallons |
| **Outside dimensions (L x W x H)** | 149 x 64 x 33 in. |
