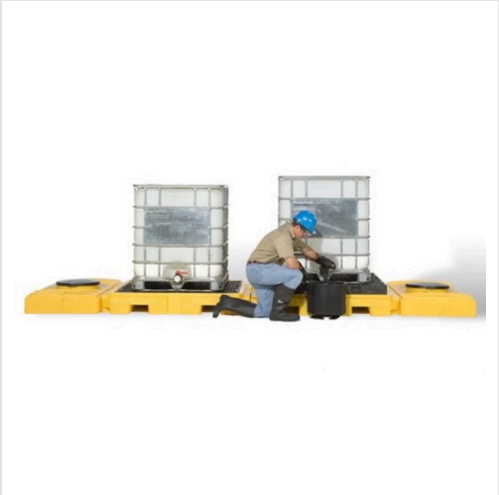
IBC Indoor Modular Spill Pallet, 2-Tote Model, Polyethylene, No Drain



This 2-tote indoor modular IBC spill pallet is a connected containment system for two IBC totes. It ships as 2 pallets and 2 expansion tanks, and the modules join with bulkhead fittings so all of them share one 280-gallon containment volume.

The low 8.75-inch decks make loading totes by forklift easy, and the system is designed to grow: add pallets and expansion tanks later as your tote count rises. Assembly kit C1118U and bulkhead fittings C1117U are available if you need them.

GOOD FOR

- Rows of IBC totes that need one connected containment system
- Facilities planning to add totes over time
- Chemical distribution and tote storage areas
