Self-Rising Wall Containment Berm, 10' x 10' x 12", Copolymer-2000, 748 Gal.

The Self-Rising Wall Containment Berm (10 ft x 10 ft outside, 12 in. walls) holds up to 748 gallons of spilled liquid for secondary containment and is made of Copolymer-2000.

The walls of this berm lie flat when it is dry, so vehicles and equipment drive right over them. When liquid enters, the walls rise on their own and form a containment basin. Place it under transformers, generator sets and fuel tanks for hands-off secondary containment.

GOOD FOR

- Fuel trucks, tankers and mobile refueling
- Generators, compressors and heavy equipment
- Drum and tote staging areas
- Vehicle maintenance and wash bays
- Frac sites, job sites and emergency spill response
