Fuel Tank Containment for 275-Gallon Tanks, 360 Gal. Capacity, No Drain

The Fuel Tank Containment for 275-Gallon Tanks is secondary containment for tanks and equipment with 360 gallons of containment capacity.

This polyethylene containment sump sits under a 275-gallon above-ground fuel tank and catches leaks, drips and overfills before they reach the ground. It holds 360 gallons, more than the tank itself, which helps you meet EPA and SPCC secondary containment rules at commercial, industrial, farm and home fuel sites.

GOOD FOR

- Above-ground fuel and oil tanks
- Farm, fleet and generator fuel tanks
- Job-site and temporary tank storage
