IBC Spill Pallet, 2 Unit Poly Platform 124.5x61-5/8x22in, 2-Shelf Drain to Sump, No Fork Pocket/Drain

This 2-tote IBC spill pallet holds two IBC totes side by side over one shared 535-gallon containment sump, enough to capture the full contents of either tote if it fails.

The 124.5 x 61.6 inch polyethylene platform supports 8,000 lbs per side, will not rust, and resists oils, acids, caustics and most chemicals. Factory-installed bucket shelves on both sides hold 5-gallon pails while you dispense, and drips from the shelves drain straight into the sump.

GOOD FOR

- 275- and 330-gallon IBC totes of chemicals, oils or coolants
- Tote dispensing stations in plants and warehouses
- Agricultural chemical and fertilizer storage
- Water treatment and cleaning chemical storage
