IBC Spill Pallet, Steel Platform 67x67x26 inches No Fork Pocket No Drain

This steel IBC tote spill pallet holds one IBC tote over a 400-gallon containment sump. Set a 275- or 330-gallon intermediate bulk container on the deck and any leak from the valve, a cracked bottle or a dispensing mistake is caught underneath.

It is built from steel, a strong choice where heat, sparks or flammable liquids rule out plastic. The deck supports 10,000 lb so a full tote sits securely.

GOOD FOR

- 275- and 330-gallon IBC totes of chemicals, oils or coolants
- Tote dispensing stations in plants and warehouses
- Agricultural chemical and fertilizer storage
- Water treatment and cleaning chemical storage

SPECIFICATIONS
