# Roll-Out Self-Rising Containment Berm, 15' x 66' x 12", 7,602 Gal.

The Roll-Out Self-Rising Containment Berm (15 ft x 66 ft inside, 12 in. walls) holds up to 7,602 gallons of spilled liquid for secondary containment and is made of heavy-duty 30 oz fabric (36 mil minimum).

Just unroll it: no tools, assembly or loose parts, and two people can deploy it in under 30 seconds. The foam-filled walls lie flat so vehicles can drive in from any side, then rise with the liquid level to form a containment basin.

## GOOD FOR

- Fuel trucks, tankers and mobile refueling
- Generators, compressors and heavy equipment
- Drum and tote staging areas
- Vehicle maintenance and wash bays
- Frac sites, job sites and emergency spill response
