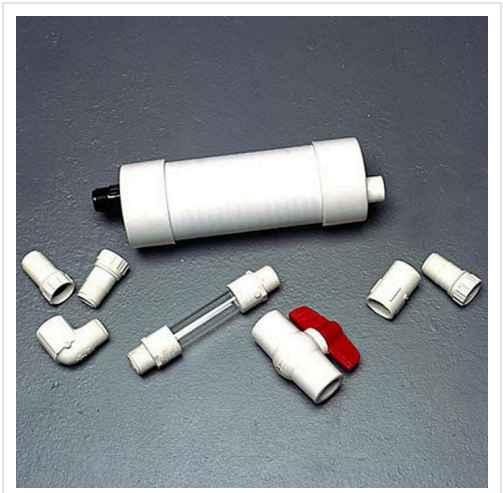
Self Bailer Kit for Containment Berms, Standard



This self bailer mounts in the berm wall and drains clean rainwater out of your containment automatically. Its hydrocarbon-sensing filter shuts the flow off when it detects oil, diesel or other petroleum, so contaminated water never leaves the berm.

The kit includes 3/4-inch NPT fittings, coupler fittings and a shut-off valve. It helps keep outdoor berms clear of rainwater and in line with EPA SPCC stormwater rules.

GOOD FOR

- Protecting a berm floor from tire wear and punctures
- Expanding or repairing an existing berm or wall system
- Draining rainwater from berms the right way

SPECIFICATIONS

Size	28" long x 3.5" diameter
Width	28" long
Depth	3.5" diameter
Flow rate	7.5 gallons per hour
Shuts off at	7-10 ounces of hydrocarbons
Weight	About 3.2 lb
Item number (SKU)	C9935U

Specifications are typical values and may change without notice. Safety Data Sheets (SDS) and other documents are available on request.
