Universal Absorbent Drip Pans, 10.5"x10.5"x3", 16/Case

Set these absorbent drip pans under small leaks, pipe joints, valves and equipment drip points to catch drips before they reach the floor. The polypropylene absorbent soaks up oil, coolant, solvents, water and other common shop fluids.

Each pan is a compact 10.5 by 10.5 by 3 inches, and a case of 16 lets you cover drip points across the whole facility. They help you keep up with EPA and OSHA spill prevention rules.

GOOD FOR

- Under drips from valves, pumps and pipe joints
- Engine and equipment drip points
- Shops that want reusable pans
