Self-Rising Wall Containment Berm, 4' x 6' x 12", PVC, 179 Gal.

The Self-Rising Wall Containment Berm (4 ft x 6 ft outside, 12 in. walls) holds up to 179 gallons of spilled liquid for secondary containment and is made of 22 oz, 24 mil PVC.

The walls of this berm lie flat when it is dry, so vehicles and equipment drive right over them. When liquid enters, the walls rise on their own and form a containment basin. Place it under transformers, generator sets and fuel tanks for hands-off secondary containment.

GOOD FOR

- Fuel trucks, tankers and mobile refueling
- Generators, compressors and heavy equipment
- Drum and tote staging areas
- Vehicle maintenance and wash bays
- Frac sites, job sites and emergency spill response
