Spill Response Kit Universal Resealable Bag

The universal spill kit that absorbs up to 10 gallons of liquid - twice as much as similar sized kits. Comes in a compact, resealable and water resistant bag.

Unlike most spill kits on the market, this kit has Sookers instead of socks. Sookers have a much larger surface area then absorbent socks. You can soak up the spill faster by applying them directly to the spill. If needed they can also be used to contain a spill like an absorbent sock by placing them end to end. The super absorbent pads in the kit are dimpled for faster absorption. Pads are also perforated down the middle so you use only what you need, saving on costs. This Universal Spill Kit will absorb water based fluids, water, oils and chemicals. Absorbency tested using medium viscosity oil.
